

**USAID**  
FROM THE AMERICAN PEOPLE

## Dear University Graduates!

Are you passionate about making the difference in Ukrainian healthcare system?

Do you speak English and Ukrainian?

Are you under 30 years of age and recently graduated from the University?

Did you study public health/policy/procurement, pharmaceutical management, economics?

**If you answered yes to all questions, this message is for you!**

USAID's SAFEMed Project implemented by Management Sciences for Health (MSH) in Ukraine is looking for young professionals just like you to **join our team for 12 months as junior consultants**. SAFEMed set up a Young Professionals Program called "Jumpstart" for the new graduates/young professionals to try themselves out as civil servants and/or development professional who will work under direct guidance and oversight of more experienced development professionals, or government agencies.

### **"Jumpstart" will offer you an opportunity to:**

- Jumpstart career at the international organization;
- Be exposed to the international experts in pharmaceutical management and public health;
- Be part of the history in making;
- See healthcare reforms in action;
- Shape the future of their own country.

Under "Jumpstart", SAFEMed will select young professionals, recent graduated from select universities to work as long-term interns in the following areas:

- Public health, public policy and management, and public procurement
- Pharmaceutical management
- Economics

### **The process is simple.**

1. Submit your CV or brief letter in English by February 16, 2020 at [ua-safemed@msh.org](mailto:ua-safemed@msh.org)
2. Get invited for an interview to meet our staff
3. If selected, join our team as junior consultants by the end of March 2020 or earlier.

Each young professionals selected will work at the SAFEMed office or at the Ministry of Health **for 12 months with a monthly pay of 16,000 UAH** (gross). At the end or during the program, junior consultants will also have an opportunity to transfer to the MOH or other civil healthcare authorities by passing exams and fulfilling vacant positions.

**About SAFEMed:** With funding from United States Agency for International Development SAFEMed (September 2017 – August 2022) applies health system strengthening best practices to create evidence-based interventions and strengthen Ukraine's pharmaceutical system in line with the MOH health reform. SAFEMed aims to improve access to appropriate, quality medicines to maximize availability within MOH's budgetary constraints. It works to institutionalize rational medicine selection, strengthen and systematize public procurement of pharmaceuticals and commodities, support sustainable public sector pharmaceutical financing, and strengthen the pharmaceutical supply chain in collaboration with the Ministry of Health.

**About Management Sciences for Health:** MSH ([www.msh.org](http://www.msh.org)) is a US-based global nonprofit organization. It works shoulder-to-shoulder with countries and communities to save lives and improve the health by building strong, resilient, sustainable health systems. Together, we seek to achieve universal health coverage—equitable, affordable access to high-quality health services for all who need them. For more than 45 years in 150 countries, MSH has partnered with governments, civil society, the private sector, and thousands of health workers on locally-led solutions that expand access to medicines and services, improve quality of care, help prevent and control epidemics, support inspiring leadership and transparent governance, and foster informed, empowered, and healthier communities.
