

## Appendix B. Specification. Pavilions.

### 1. Pavilions 3.0x3.0 m, with a total area of 9.0 m<sup>2</sup> (in the amount of 10 pieces).

Characteristics - the wooden trade pavilion is intended for retail trade at fairs (New Year's, Christmas ...). The possibility of quick and easy installation and dismantling allows you to use the pavilion in large quantities for trade and other events.

#### The pavilion consists of:

- wall cladding board 90x15 mm color gray or white two-layer covering with ecological water varnish;
- bar of assembly 45x45 mm;
- external bill of lading to strengthen the structure of the pavilion;
- floor board 35 mm, logs, beams;
- external shelf and decorative fence on the outside on three sides of the pavilion;
- internal shelf in the pavilion according to the project;
- entrance doors on the back wall of the pavilion, fastening under the padlock;
- portable structure on a decorative dormer window on the roof of the pavilion;
- decorative window on the facade of the house;
- 6 polycarbonate windows on three sides of the pavilion;
- metal roofing, red-brown color.
- dimensions of the pavilion according to the drawing below:
